

SAIC Wins U.S. Customs and Border Protection's \$742 Million Recompete Contract for Traveler and Cargo Security Systems

September 29, 2026

Five-year task order provides comprehensive systems support for integrated capabilities that strengthen U.S. border security, protect the American people, and support national economic prosperity

RESTON, Va., Sept. 29, 2026 (GLOBE NEWSWIRE) -- Science Applications International Corp. (NASDAQ: [SAIC](#)) announced today it has been awarded a \$742 million recompete task order to provide full-scale support for U.S. Customs and Border Protection (CBP) systems that are essential to securing our borders and assessing security risk from travelers and cargo entering our country. This award further cements SAIC's critical role in helping CBP drive an integrated border security mission.

As the prime contractor, SAIC will provide comprehensive systems support, including software development, operations, maintenance, upgrades, and enhancements. The work will help CBP rapidly respond to evolving technologies, threats, and mission requirements in support of Department of Homeland Security (DHS) initiatives to strengthen U.S. border security, protect the American people, and support national economic prosperity. The task order was issued under Alliant 2 and has a period of performance from September 15, 2026, through September 14, 2031.

"For more than 25 years, our teams have partnered with CBP to further its mission, tackle its operational challenges, and meet the needs of its highly skilled workforce," said Prabu Natarajan, SAIC Chief Financial Officer and Interim Leader of the Civilian Business Group. "We do not just build tools for operators; we develop and enhance integrated capabilities for the CBP. By applying our 'Operator First' mission-driven approach, and outstanding performance, we will help CBP achieve faster, safer and more effective mission outcomes."

SAIC also recently won a five-year, \$199 million recompete task order for the agency's Integrated Traveler Initiatives (ITI) 2.1 program. Through ITI 2.1, SAIC will continue supporting technologies that enable secure and efficient processing at ports of entry and inspection checkpoints.

About SAIC

[SAIC®](#) is a premier mission integrator focused on advancing the power of technology and innovation to serve and protect our world. Our robust portfolio of offerings across the defense, space, intelligence, and civilian markets includes secure high-end solutions in mission IT, enterprise IT, engineering services, and professional services.
